## National Integrated Land System

## **Data Themes and Layers - Public**

The following data themes are maintained in the National Integrated Land System (NILS) through the Survey Management (SM), Measurement Management (MM) or the Parcel Management (PM) transaction modules. The data from NILS is made available to the public for access and downloading through NILS' GeoCommunicator (www.geocommunicator.gov). Many of the themes are also available as Map Image Services that can be accessed through GIS software.

## NILS' GeoCommunicator – www.geocommunicator.gov Data available as a map service, downloadable data, and/or in a mapping application

Data avallable as a map servi	ce, downloadable data, and/or in a mapping application
PLSS (Public Land Survey System)  Map service: www.geocommunicator.gov Service Name: BLM_MAP_PLSS BLM_LSIS_wms  Downloadable from Land Survey Information Section Land & Mineral Use Record Data (pending, active, and closed cases)  Access to Serial Register Page and Township Geographic Reports from LR2000. Access to BLM State online Master title plats.	Graphic representation of PLSS including Meridians, Township, Range, Sections, subdivisions, and special surveys (not fully populated) providing the foundation for a multipurpose cadastre. Includes BLM's GCDB data and alternate source data from other agencies including the USFS and the Risk Management Agency (RMA). This data layer contains both survey and unsurveyed data.  Progress has been made to fill in most of the missing PLSS data with additional alternate source data.  Stipulations - For CO, MT, NM, CA, OR, and WA. BLM_MAP_SOLID_MINERALS  Coal Leases  Logical Mining Units (coal)  Known Leasing Areas  Other Solid Mineral Leases, Permits, and Licenses BLM_Other_Lease_wms  Mineral Materials Disposal
Map service: www.geocommunicator.gov Service Name: BLM_MAP_GEOTHERMAL • Geothermal Leases &	<ul> <li>Non-mineral Uses, Leases and Permits</li> <li>Oil &amp; Gas Sale Parcels for CO, WY, and NM. Access to State Office sale website and sale notice.</li> <li>Rights-of-Way</li> <li>BLM_PARCELS_wms</li> <li>All parcel cases</li> </ul>
Agreements BLM_MAP_MINING_CLAIMS  Mining Claims BLM_MAP_OIL_AND_GAS  Oil & Gas Leases & Agreements	<ul> <li>All parcel cases</li> <li>BLM_SUBSURFACE</li> <li>BLM subsurface mineral estate for WY and NM. More will be added as they become available.</li> </ul>

Additional NILS GeoCommunicator Tools	
Geocoder	Geocoder allows for the conversion of Latitude and Longitude (Lat/Long) values into Township, Range, and Section values. Likewise, Township, Range, and Section values can be converted into polygon centroids in Lat/Long format.

A majority of our spatial data has been linked to the systems that manage the attribute data, this way users can go back and forth from the graphic representation in the GIS to the detailed attribute data in the transaction systems. NILS is a joint development project between the BLM and the USFS.

Contact Leslie Cone at <u>Leslie Cone@blm.gov</u> or go to <u>www.blm.gov/nils</u> for more information.
